# CTGP-7 Installation Instructions

## Installation methods:
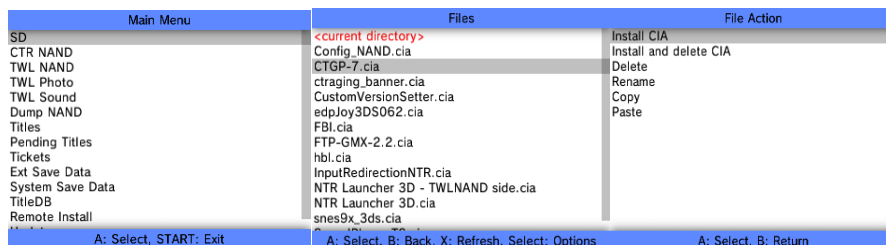

To play CTGP-7, you need Custom Firmware and your system version to be 11.4 or greater. The mod has an automatic updater, so you do not need to re-install everything on each update. CTGP-7 is provided as two application types:

a) **Cia (recommended):** Installs to the home menu like any other app. You will be able to launch the mod directly from the home menu.
b) **3dsx**: Can be launched from the Rosalina homebrew launcher. It does not require the installation of cia files, but it still requires custom firmware.

## Method 1: Using a PC or phone to copy the files:

This method requires any device that can download files and transfer them to the SD card of the console.

1) Extract the SD from your 3DS and connect it to the computer. You can also use MicroSD Management or an FTP clien. Make sure you have at least 1GB of free space before continuing.
2) Download the **cia** or **3dsx** from gamebanana. For the **cia**, place the file in your SD card, go to **FBI** in the home menu, go to the SD, select the CTGP-7 cia and chose **Install CIA.** For the **3dsx**, copy the file to the **3ds** folder (if it does not exist, create it).

3) After the app has been installed, you will find it on your home menu (**cia**) or in the homebrew launcher (**3dsx**).

4) Open the CTGP-7 installer app, the installer will ask you to continue with the installation. After the installation has finished the app will reboot and you will be able to play the mod.

5) **(Optional)** You can now remove the CTGP-7 installer **cia** file or **3dsx** (only the >400MB one) from the SD card to free some space as it will not be needed anymore.

## Method 2: Installing directly from a 3DS:

This method can be used to install the mod if you do not have access to a device to copy the files to the SD card. However, you will need an internet connection in your 3DS. This method is not recommended as the installation process could take **more than 2 hours** due to the slow download speed of the 3DS.

1) Open **FBI**, then go to **Remote Install** and finally **QR Code.** Scan one of the following QR codes:

**CIA Downloader       3DSX Downloader**

2) After the install is done, open the **CTGP-7 Downloader** app and follow the steps there. This process can take some time.
3) Once the download finishes and the app closes, go to step **4** in the **Method 1**.

## Uninstalling:

To uninstall the mod, go to **FBI**, then **Titles**, from the list select **CTGP-7** and choose **delete title.**

After that, you can delete the **CTGP-7** folder on your SD card as well as the **3dsx** inside the **3ds** folder if it exists.
