# CTGP-7 Citric Lite

Installation Instructions

Installation methods:

To play CTGP-7 Citric Lite, you need to download the latest Citra Emulator Nightly build: (https://citra-emu.org/download/). Note that you need to provide your own copy of Mario Kart 7. You can follow the instructions here to dump your own copy: (https://citra-emu.org/wiki/dumping-game-cartridges/ or https://citra-emu.org/wiki/dumping-installed-titles/). After you have tested your Mario Kart 7 is working fine, you can start with the CTGP-7 Citric Lite installation instructions below:
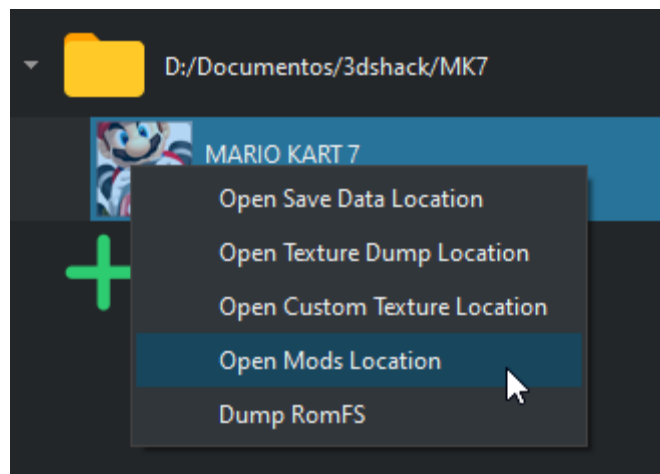

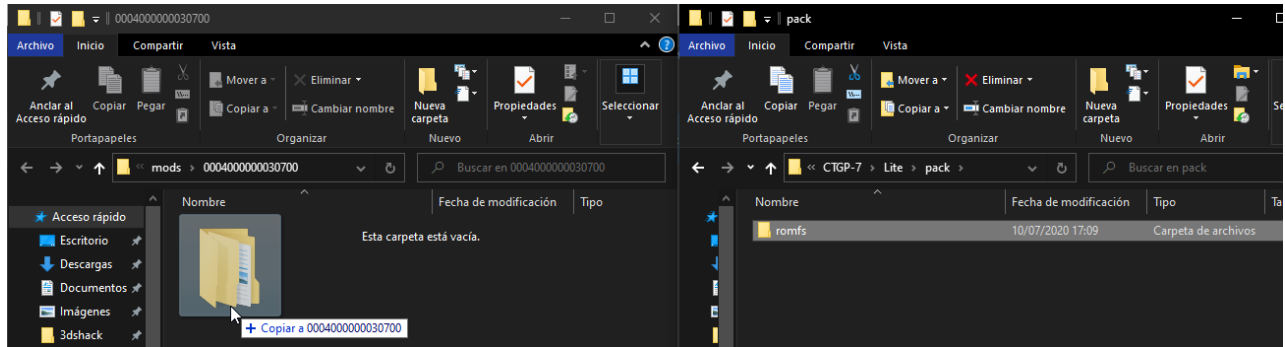

1) Make sure the Mario Kart 7 game appears in the game list. If it does not, you can click the "+ Add new game directory" button and select the folder containing the Mario Kart 7 rom.

2) Right click the Mario Kart 7 icon and press "Open Mods Location". An empty folder should open. (If you did not install any mods previously.)

3) Open the CTGP-7 Citric Lite zip file you downloaded from gamebanana. It should contain a "romfs" folder inside. Copy the "romfs" folder from the zip file to the directory that was opened previously. (The name in the screenshot may vary). The mods directory should now have a "romfs" folder.

4) Launch the game and the CTGP-7 Citric Lite patches should be applied.

Uninstalling:

To uninstall the mod, follow the steps 1) and 2) in the installation guide. When the directory opens, just remove the "romfs" folder. CTGP-7 Citric Lite should be uninstalled now.
